Course Description

This course serves as an introductory analysis of pollution and the overuse of natural resources. The course applies microeconomic reasoning to compare observed pollution and resource use in the world with the socially optimal outcomes, and to understand the potential for markets and government policies to address existing problems related to the environment.

Course Learning Objectives

Upon course completion students are expected to be able to:

- critically evaluate statements and policies related to the environment;
- understand the tradeoffs faced in environmental policy;
- convey economic arguments to a general audience;
- apply their knowledge in a wide range of professional capacities; and
- serve as better informed global citizens.

Prerequisite

In general, completion of ECON 1013 with a grade of C- or better (or approval of the instructor). Students without a background in supply and demand analysis may find parts of the course more challenging, but I will review the required microeconomic concepts as necessary.

Course Materials and Websites

ACORN is the primary source for class announcements and will contain all course materials: syllabus, class notes/slides, video recordings, and materials for quizzes and exams.

Microsoft Teams may be utilized for office hours and review sessions.

Technology Issues & Support

If you are having technological issues, please contact the Service Desk for support. The Consultants will help you work through any issues that you're having. There are several contact methods:

Live Chat: ts-chat.acadiau.ca

HUB Service Portal: hub.acadiau.ca or ts.acadiau.ca

Phone: 902-585-4357 or 1-888-609-3330

Email: helpdesk@acadiau.ca

How to Ask Questions?

I encourage you to ask questions throughout the course. I can promise you that if you have a question, several of your classmates have that same question. There are many ways to ask questions relating to material discussed in class:

- In person during class
- Via Teams using the chat feature
- During office hours
- Via email

Office Hours

I will hold scheduled office hours but will also be available by appointment this semester. You are welcome to send me an email to schedule a time to meet. Office hours may be held in my office or over Teams.

Should any issues or concerns arise throughout the course, you are encouraged to consult with me as soon as possible so that we can work together to find the resources to help you succeed.

Textbook

The textbook for the course, which is required, is:

“Environmental Economics: An Introduction, 8th Edition”, by Barry Field and Martha Field, McGraw-Hill. ISBN: 9781260575491.

A link to purchase the book from the campus bookstore is available on ACORN. Our course will follow the organization of the 8th edition of the textbook fairly closely according to the

scheduled outlined below, though previous editions of the textbook may be similar and could be used for the course.

Assignments

We will have three assignments throughout the course:

- Assignment #1: Climate change and sea level rise analysis (due Feb 9)
- Assignment #2: Regulating carbon emissions (due Mar 28)
- Assignment #3: Discussion of current events (due Apr 6)

Specific instructions will be provided as the course proceeds.

Midterm Test

There will be one midterm test in the course. The test will be held on Thu, Feb 16. More details regarding the format and focus of the test will be provided closer to the test date.

No make-up test will be provided; the weight of a missed test will be reassigned to the weight of the final exam in determining your overall grade for the course.

Final Exam

The Final Exam will be held on the date determined by the Registrar. Unless there is a valid reason (*approved in advance*), students are required to take the exam on the date assigned by the University. The Final Exam will cover the entire course. Practice exam(s) and a study guide will be provided in advance. More details regarding the format and timing of the exam will be provided closer to the exam date.

Grading

Assignment #1	10%
Assignment #2	15%
Assignment #3	15%

Course Policies

Course dates/policies are outlined at the beginning of the course and are the student's responsibility; please communicate any issues, concerns or scheduling conflicts *well before* the relevant deadline so that we can address the issue appropriately.

Please communicate with me if an illness or other issue will cause you to miss multiple classes. I ask that students exercise proper classroom etiquette in respect of their classmates and the instructor.

Accessibility

Acadia University is dedicated to improving access to campus life for all students with disabilities. While we attempt to ensure that all courses are accessible, we recognize that there are barriers that need to be addressed on an individual basis. Students who require accommodations to complete coursework or otherwise fully participate in class should contact Accessible Learning Services directly as soon as possible.

Please visit the Accessible Learning Services website (<https://www2.acadiau.ca/student-life/accessiblelearning.html>) or email them at accessible.learning@acadiau.ca for more information.

Academic Ethics

It is the responsibility of students to familiarize themselves with the University's policy on academic ethics. Copying, plagiarism and other academic offenses will not be tolerated. Penalties are severe and may result in suspension from a program/course and expulsion. A complete list of Academic Regulations can be found on the Policies page of the University's website. I strongly recommend that all class members review the sections in the 2022-23 academic calendar dealing with Academic Policy and Regulations. It is a serious offense to engage in academic misconduct.
